Position: Senior Integration Developer/ Senior Software Engineer

Functional Area: Software Development

Software Integration and cloud based platform development. This is a Greenfield product development that requires people with deep knowledge of xml, xslt, .net core, OOPS concepts, web api to develop a sophisticated cloud based software platform and integration solutions.

Job description

- Strong Proficiency with JavaScript and HTML5.
- Deep Knowledge of XSLT, XPATH.
- Seasoned programming skills on Microsoft DotNet and C#
- Creating self-contained, reusable, and testable modules and components.

Experience required: 5+ years

Skills required:

- 5+ years' experience with C#, .NET, distributed architectures, micro services, ETL, Web Services, SOAP, REST services.
- Serve as the subject matter expert, mastering existing API based ETL tool capabilities as well as future enhancements as they become available, in order to continually improve our business intelligence offerings.
- Worked as integration developer to create new integrations between systems
- Responsible for troubleshooting data issues and conducting root cause analysis when reporting data is in question
- Lead and/or participate in various projects intended to continually improve/upgrade infrastructure, including evaluation of new software and hardware required, to meet organizational business needs or to make processes more efficient and cost- effective
- Design, develop and test integration code
- Working knowledge of software engineering principles and modern development technologies
- Ability to quickly learn and adapt to new languages and environments
- Experience working with multiple functions/departments throughout the Software Development Life Cycle (e.g. requirements, QA, deployment, build team, support and integration)
- Excellent verbal and written communication and interpersonal skills
- Experience working in a collaborative environment with teams of people
- Should have understanding and experience of software development best practices, Agile Scrum experience and driven projects on Agile Scrum model
