

Job Description:

We are looking for a Web Developer with experience of 5+ years who is motivated to combine the art of design with the art of programming. Responsibilities will include translation of the UI/UX design wireframes to actual code that will produce visual elements of the application. You will work with the UI/UX designer and bridge the gap between graphical design and technical implementation, taking an active role on both sides and defining how the application looks as well as how it works.

Responsibilities:

- Develop new user-facing features
- Build reusable code and libraries for future use
- Ensure the technical feasibility of UI/UX designs
- Optimize application for maximum speed and scalability
- Assure that all user input is validated before submitting to back-end
- Collaborate with other team members.
- Critical thinker and problem-solving skills

Skills and Qualifications:

- Proficient Knowledge of web markup, including HTML5, CSS3, Bootstrap and JavaScript.
- Proficient understanding of client-side scripting and JavaScript frameworks, including jQuery.
- Knowledge of Angular JS will be an advantage.
- Basic knowledge of image authoring tools, to be able to crop, resize, or perform small adjustments on an image.
- Excellent knowledge of browser troubleshooting and debugging practices and techniques.
